Ready for shipment from:

- **ABS has developed a new approach to stone veneer cladding called Talus Wall Systems. This unique approach allows the pre-cast stones to be installed quickly and easily to sheathing with the use of nails or screws. This new, innovative building product will save time and money on your next project.**
- **We are excited about Talus, and hope you will find them to be the perfect match on future projects. As you review our attached information, please note that our products come with a prideful 50-Year Warranty.**

Advanced Building solutions

Presents:

# TALUS WALL SYSTEMS

Professionally and efficiently installed stone veneer.

**Units can be screwed or nailed over the sheathing, attached to the studs, directly on top of the house wrap..**

Talus is pre-engineered architectural stone veneer simultaneously cured to a glass fiber reinforced backer for easier installation...

# TALUS WALL SYSTEM

Product designed to be installed by a siding contractor, mason or do-it-yourselfer..

TALUS WALL SYSTEM  
Panels are easily cut to correct size..

## TALUS WALL SYSTEM

Stones are strategically left out to allow an area for fasteners..

## TALUS WALL SYSTEM

Once Talus is attached to the wall, loose stones are mortared into place to conceal the joints and fasteners..

TALUS WALL SYSTEM  
Fitting in loose preselected mortared stone  
for an easy finish..

TALUS WALL SYSTEM  
Finished wall..

TALUS WALL SYSTEM  
Available in 12 beautiful choices..
